SUMMARY

Detail-oriented BCA student with hands-on experience in machine learning and NLP projects, including classification and recommendation systems. Proficient in Python, SQL, and data preprocessing, with a strong foundation in model evaluation and data analysis. Familiar with LLM concepts, prompt understanding, and AI data workflows, including basic data annotation and response evaluation. Eager to contribute to AI model improvement through structured analysis, quality assessment, and attention to detail in data-driven environments.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, MS Excel, NumPy, Pandas, Scikit-learn, Matplotlib, Streamlit

AI & LLM Concepts: Supervised Learning, Regression, Classification, Natural Language Processing, Prompt Understanding (Basic), LLM Evaluation, Data Annotation (Basic)

Data Handling & Processing: Data Cleaning, Data Preprocessing, Feature Engineering, Structured & Unstructured Data Handling

Model Evaluation & Analysis: Model Evaluation Metrics, Output Validation, Error Analysis, Quality Assessment

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis

Soft Skills: Attention to Detail, Critical Thinking, Problem Solving, Communication, Team Collaboration

EDUCATION

Bachelor of Computer Applications (BCA)

Vivekananda Institute of Professional Studies – Technical Campus (VIPS-TC)

Guru Gobind Singh Indraprastha University (GGSIU), New Delhi

2023 – 2026 (Expected) | Current CGPA: 9.02/10

Class 12th | CBSE | 2023 – 86.4%

Class 10th | CBSE | 2021 – 92.4%

PROJECTS

Fake News Detection App | Python, NLP, Scikit-learn, Streamlit

- Built an NLP-based classification model using TF-IDF and Logistic Regression to identify fake vs real news
- Performed data preprocessing, text cleaning, and feature extraction for improved model performance
- Evaluated model outputs based on accuracy and consistency to ensure reliable predictions

Movie Recommendation System | Python, NLP, Scikit-learn

- Developed a content-based recommendation system using text vectorization and cosine similarity
- Processed and analyzed movie metadata to generate relevant recommendations
- Focused on improving relevance and coherence of recommendations through similarity scoring

House Price Prediction | Python, Pandas, Scikit-learn, Matplotlib

- Built a regression model to predict house prices using structured datasets
- Evaluated model performance using standard metrics to ensure prediction accuracy
- Visualized data trends and model outputs for better interpretability

Titanic Survival Prediction | Python, Pandas, Scikit-learn

- Implemented classification models (Logistic Regression, KNN) to predict passenger survival
- Compared model outputs and evaluated performance to select the best approach
- Applied structured problem-solving and data validation techniques
