SUMMARY

Detail-oriented BCA student at Vivekananda Institute of Professional Studies – Technical Campus (GGSIPU) with hands-on experience in machine learning projects including Fake News Detection, Movie Recommendation, and House Price Prediction. Proficient in Python, SQL, and data analysis tools, with a strong foundation in supervised learning, NLP, and end-to-end ML workflows. Eager to apply AI techniques to solve real-world problems.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, MS Excel, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Streamlit, GenAI Tools, LLM Ops

Machine Learning & AI Concepts: Supervised Learning, Regression, Classification, Natural Language Processing (NLP), Data Cleaning, Data Preprocessing, Feature Engineering, Model Evaluation

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis

Soft Skills: Critical Thinking, Problem Solving, Communication, Team Collaboration

EDUCATION

Bachelor of Computer Applications (BCA)

Vivekananda Institute of Professional Studies – Technical Campus (VIPS-TC)

Guru Gobind Singh Indraprastha University (GGSIPU), New Delhi

2023 – 2026 (Expected) | Current CGPA: 9.02/10

Class 12th | CBSE | 2023 – 86.4%

Class 10th | CBSE | 2021 – 92.4%

PROJECTS

Titanic Survival Prediction

Technology Stack: Python, Pandas, Scikit-learn

- Built a supervised classification model using Logistic Regression and KNN, applying data preprocessing and feature engineering to predict passenger survival.

House Price Prediction

Technology Stack: Python, Pandas, Scikit-learn, Matplotlib

- Developed a regression-based ML model with EDA, feature encoding, and model saving to predict house prices from structured data.

Movie Recommendation System

Technology Stack: Python, NLP, Scikit-learn

- Built a content-based movie recommendation system using NLP vectorization and cosine similarity to generate personalized suggestions.

Fake News Detection App

Technology Stack: Python, NLP, Scikit-learn, Streamlit

- Developed and deployed an NLP-based fake news classifier using TF-IDF and Logistic Regression with real-time predictions via Streamlit
